DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (i.e. claims 1-60) in Paper No. 03/24/2004 is acknowledged.
2. Claims 61-84 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 03/24/2004.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to a pulse-multiline excitation apparatus, classified in class 356, subclass 417.
 - II. Claims 39-60, drawn to a method of identifying sample components, classified in class 356, subclass 317.
4. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as analysis by light intensity. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
